Subject: Development-Software Engineer

Dear Hiring Manager,

Please accept my letter for the Development - Software Engineering position with Zappos. I learned about this opportunity through Piazza. I am currently pursuing my Masters of Science in Computer Science at the University of New Hampshire and intend to graduate in May of 2016. I have a comprehensive software/technology background and would very much like to be a part of your technology team.

My work experience as a Software Engineer in Bangalore, India and as a Summer Technology Intern at Financial Industry Regulatory Authority in designing and developing Java services using ReST framework, has provided me with both exposure and expertise in a number of tools and frameworks related to the needs of your company. Additionally, in both roles I displayed leadership qualities by promoting best practices in the team. I introduced the group to unit testing by designing and setting the test architecture and enhanced my knowledge about JUnit and Mockito—both used for testing.

Currently, I am working as a Programming Consultant at the UNH Programming Assistance Center where I provide programming help to students in C, C++, and Java languages. This experience has improved my problem solving and debugging skills to a greater extent.

The knowledge of Java and my prior work experience in designing, developing, and unit testing combined with my keenness to learn new things make me a strong candidate for this position. As a proactive and enthusiastic individual, I would welcome an opportunity to discuss my software engineering capabilities with you.

Thank you for your time and consideration. I look forward to meeting with you soon.

Sincerely,

Jane Doe
