Designed primarily for teachers of secondary and middle school mathematics, this program provides a broader and deeper background in several areas of mathematics including algebra, geometry, and analysis. Explore additional content areas of mathematics and issues related to mathematics education with fellow educators.

Candidates for admission must possess a background in mathematics equivalent to a minor (including calculus), and an educational background sufficient for certification, or teaching experience, or a teaching position at the present time. The GRE is not required.

The University of New Hampshire is located in Durham, a picturesque New England town close to the Atlantic coast beaches, the cities of Portsmouth, Boston, Portland, and the Lakes Region and White Mountains.

Enroll in UNH summer graduate courses at approximately $483 per credit. You do not need to matriculate into the MST Degree Program to take MST courses. Staff development funds from your school may help support summer coursework.
