MESSAGE FROM THE CHAIR

Welcome to the 5th Week of Fall 2020!

Thank you for wearing your masks, practicing social distancing and following the COVID-19 protocol for UNH. I would like to remind all of you to keep your Wildcat Pass valid as any UNH staff or faculty can ask you for it at anytime. Please visit <https://unh.edu/coronavirus> for up-to-date information on COVID-19 testing and other protocol across campus.

Thank you to the almost 100 participants in the first seminar in the CEE Social Justice series. Dr. Tracy Corley of Mass, Inc. gave a great seminar on ways that civil and environmental engineers can play an active role in social infrastructure. The recording of the seminar will be available on the CEE student CANVAS page. Dr. Corley provided references for her slides - see below. If you would like to hear more about Dr. Corley's work, you can check out her latest research on the importance of equity for transformative transit-oriented design. There are also online forums/seminars available through a variety of outlet - here are a few examples: Boston NPR - <https://www.wgbh.org/news/forum-network>, ASCE - <https://www.asce.org/advocacy/>, AAAS - <https://www.aaas.org/events>.

If you know of other events or have any feedback on this seminar or this semester, please share them with me. I am happy to get your feedback and input.

*Have a great week!
Professor Bell*
