MESSAGE FROM CHAIR

Two weeks of Fall, 2020 are in the books! As we continue learning and adapting to our new modes of operation, I would like to remind you that your feedback is valued and vital to a successful semester for all. Please let your instructors know if the sound quality is poor or your Zoom video is blurry. We want to improve and need your feedback. If you don’t feel comfortable speaking in lecture, you can see your advisor, the program coordinators (Professor Cook-BSCIVE & Professor Mouser-BSENVE) or myself.

RESEARCH ASSISTANT OPPORTUNITY

Dr Jacobs is looking for an Undergraduate Research Assistant to work on climate change and infrastructure. Strong analysis skills are required! Will consider any level student.
If interested, send email to Dr. Jacobs - jennifer.jacobs@unh.edu

We had our second CEE Town Hall last Thursday, organized by ASCE/EWRI student chapters. You can also contact these organization leaders with any concerns you may have and they will relay them to me. We will continue to offer opportunities, as the town hall throughout the semester.

Thank you & Go Wildcats!
Professor Bell
